# Example Biomass on contaminated sites (agricultural area)

Harvest  
after 3 Years

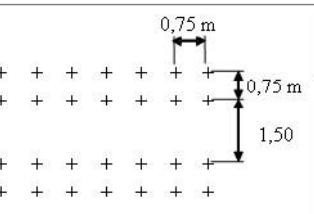

Anlagejahr: 2005

Größe: 2 ha (ca. 200 x 100 m)

Bestandesdichte: ca. 11.850 Stecklinge/ha

Sorten: Pappeln: Weser 6, Max 3, Hybride 275

Weiden: Jorr, Sven, Tora, Tordis, Gudrun

Standort:

mittlere Niederschlagssumme: 820 mm

Jahresdurchschnittstemperatur: 7,2 °C

Höhe über NN: 320 m

Ackerwertzahl:

45

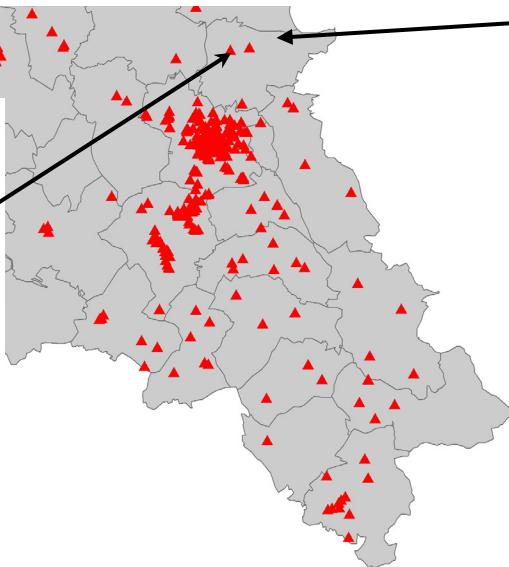

Bodenart / Entstehung:

sandiger Lehm / Lö 6

97 mg As/kg

3 mg Cd/kg

352 mg Pb/kg

Evaluation

# Development of a Transnational Database Concept

## with common parameters

Basic Data	Data field	Data field
	Designation	Heritage
	Type	Contaminated Sites (Number)
	Community	Remark
	Municipal area	Total m <sup>2</sup>
	Street	Net built m <sup>2</sup>
	Postcode / City	Easting
	Locality	Northing
	Parcel	ID number
	Location Category	Registered on
	Location	Last
	Property Category	Internet release issued
	tested by the owner	Contact
	Suspected contaminated	Contact Type
		The Internet Show

# **Development of a Transnational Database Concept with common parameters**

**Questions:**

- more parameters: social, economic aspects
- Database: Open Office? (MS-ACCESS ?)
- GIS: Free GIS-Viewer? (Christine-GIS ?)
- Remote sensing data? Satellite, digit. Photo?  
Google Maps?

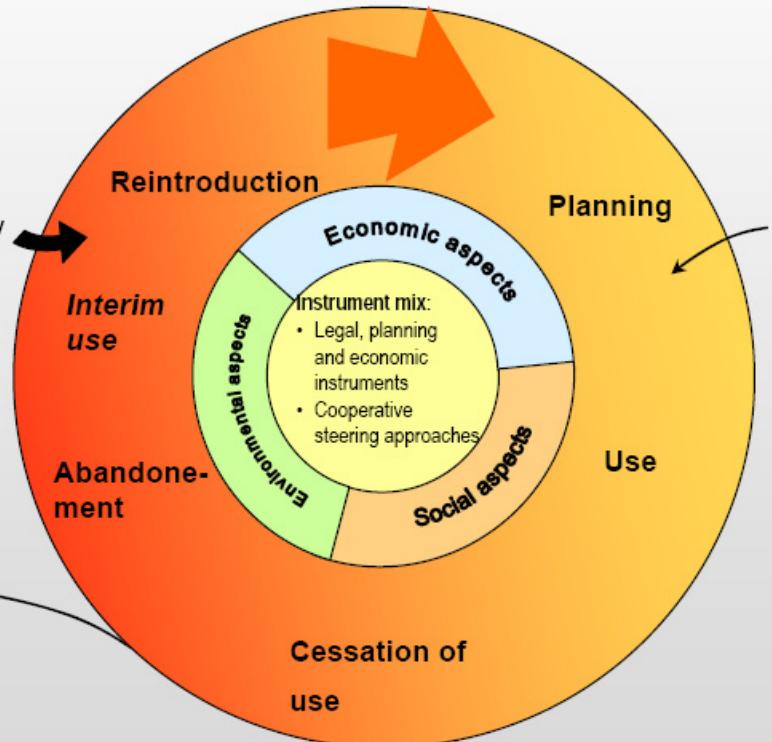

# Strategic approach: Circular Land Use Management

Mobilisation of site potentials:

- brownfields (trade, industrial or military)
- spaces between buildings in town and city centres
- urban redevelopment sites
- sites undergoing planning

Rejection of sites which are unsuitable for new uses on a long-term basis

Source: Research group "Fläche im Kreis", 2005)
